Art Unit:

Claims 16-30 are presented for examination.

Claims 16-30 rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The instant specification fails to provide support for tautomeric forms of ring A, B, C and D as set forth in the newly submitted claims. This is considered to be new matter introduced into the claims of the instant application.
